ECB's Strategic Interest Rate Cut to Stimulate Eurozone Economy & Curb Inflation Updated on : Mar 07, 2025 11:21 am

Synopsis: On March 6, 2025, the European Central Bank announced a 25 basis point cut in its key interest rates as part of its ongoing efforts to control inflation and promote economic recovery. The ECB's proactive measures are designed to maintain a balance between managing inflation and encouraging growth in the Eurozone economy. <u>Read on...</u>

Revving Up Europe's Car Industry: The EU's Bold Action Plan for a Sustainable Automotive Future Updated on : Mar 07, 2025 11:20 am

Synopsis: In 2025, the European Union took bold steps to future-proof its automotive sector through the launch of the Action Plan for the Automotive Industry. Focused on innovation, sustainability, and global competitiveness, the plan includes strategies to advance zero-emission vehicles, improve supply chains, and tackle workforce challenges. With a focus on both economic growth and environmental protection, the EU aims to position itself as a global leader in the next generation of cars. Read on...

Fire Disrupts Salzgitter's Flat Steel Production, Impacting Supply & Prices Updated on : Mar 07, 2025 11:20 am

Synopsis: A fire at Salzgitter's hot-rolling mill in Germany has caused a significant disruption in production, especially for hot-rolled, cold-rolled, and hot-dip galvanized coils. While the company works on repairs, this incident is expected to affect supply and could drive up steel prices in the region. Read on...

Ogun Steel Factory Explosion: Seven Injured, Investigation Launched into Fatal Blast Updated on : Mar 07, 2025 11:20 am

Synopsis: An explosion at Quantum Steel in Ogun State left seven workers seriously injured, including three expatriates. The blast occurred on March 2, 2025, and was caused by machinery failure. The Ogun State Police have launched an investigation into the incident, and the state government has shut down the factory for further inspection. The injured workers are currently receiving medical treatment at a hospital in Lagos. Read on...

Amitava Mukherjee Appointed as CMD of NMDC: A New Era for Indian Mining

Leadership

Updated on : Mar 07, 2025 11:19 am

Synopsis: Shri Amitava Mukherjee has been appointed as the Chairman & Managing Director of NMDC Limited effective from March 6, 2025, as per the official Ministry of Steel order. With his vast experience in financial leadership and significant contributions to the mining industry, Mukherjee aims to guide NMDC towards even greater milestones in production, expansion, and innovation. US Grants One-Month Breather: Trump Temporarily Exempts Canada & Mexico from Steel Tariffs

Updated on : Mar 07, 2025 11:19 am

Synopsis: President Donald Trump has temporarily exempted Canada and Mexico from the newly imposed 25% tariffs on steel, providing a one-month reprieve until April 2. This unexpected move was part of a last-minute amendment under the North American trade pact and offers brief relief for U.S. trading partners. However, the future of cross-border trade remains uncertain as businesses and policymakers await further developments. Read on...

<u>Trump's Ironclad Decision: Tariffs on South Korea's Steel & Aluminum Products Begin</u> <u>Next Week</u>

Updated on : Mar 07, 2025 11:19 am

Synopsis: US President Donald Trump confirmed that the 25% tariffs on steel and aluminum will be imposed on South Korea starting March 12, 2025, ending the exemptions previously enjoyed by the country. This move, which impacts Korean companies that had been granted tariff-free status in exchange for accepting export quotas, will also lead to the automatic removal of those quotas. Trump further stated that most tariffs will be reciprocal, with major tariff changes expected by April 2, 2025. Read on...

A Fragile Reprieve: Canada's Steel Industry Faces Uncertainty Amid US Tariff Pauses & <u>Trade Tensions</u>

Updated on : Mar 07, 2025 11:19 am

Synopsis: Catherine Cobden, President and CEO of the Canadian Steel Producers Association, expressed cautious relief at the U.S. Administration's decision to temporarily pause the 25% tariffs on Canadian steel and aluminum imports. While this provides short-term relief until April 2, 2025, Cobden stressed that the pause is not a permanent solution. She called on Canada's governments to take urgent action to protect the Canadian steel sector and pursue long-term strategies with the U.S. to prevent further harm from tariffs and trade disruptions. Read on...

Strengthening US Steel: The Battle Against Global Trade Crimes Through New Legislative Action

Updated on : Mar 07, 2025 11:18 am

Synopsis: The American Iron and Steel Institute has expressed strong support for the "Protecting American Industry and Labor from International Trade Crimes Act," which was introduced by Reps. Ashley Hinson (R-IA), Raja Krishnamoorthi (D-IL), and Rep. John Moolenaar (R-MI). This bill aims to establish a task force within the U.S. Department of Justice to combat trade crimes, especially those perpetrated by foreign entities like China, that harm American businesses and industries. <u>Global Recycling Giants BIR & EuRIC Challenge European Steel Summit's Proposal for</u> <u>Trade Restrictions</u> Updated on : Mar 07, 2025 11:18 am

Synopsis: The Bureau of International Recycling and the European Recycling Industries' Confederation have voiced strong opposition to proposals made at the Summit on the Future of the European Steel Industry. These proposals call for trade restrictions on recycled steel exports, a move which the organizations argue would harm both the European and global recycling industries, as well as undermine environmental goals. The recycling industry leaders have presented alternative strategies to foster sustainability and efficiency in the sector. Read on...

Revolutionizing Silicon Steel: Fujian Kebao's New Continuous Tandem Cold Mill to Drive Production Growth

Updated on : Mar 07, 2025 11:18 am

Synopsis: Fujian Kebao Metal Products, a subsidiary of Sanbao Group, has ordered a new continuous tandem cold mill from Primetals Technologies to increase its production capacity of high-grade silicon steel. The new mill will help the company meet growing demand and enhance its position as a leading supplier of silicon steel and tinplate in China. The mill's advanced automation, precision controls, and increased production capacity will enable Fujian Kebao to meet stringent production requirements and expand its role in the global steel market.

In-Depth Numerical Investigation of Steel Casing Penetration in Riprap-Infused Estuarine Mudflats Updated on : Mar 07, 2025 11:16 am

Synopsis: This study offers a comprehensive numerical analysis of the factors affecting the behavior of steel casings during their penetration in estuarine mudflats, specifically in environments containing riprap. The research uses the finite element method to evaluate the impact of casing length, diameter, and wall thickness on stress distribution, deformation, and the overall mechanical performance of the casing during the sinking process. The results provide valuable insights into improving the design and construction of steel casings in riprap environments, with particular applications for seawall projects in estuarine regions.

<u>China's Steel Industry Restructuring: A Major Shift Towards Sustainability & Market</u> <u>Stability</u>

Updated on : Mar 07, 2025 10:16 am

Synopsis: China has announced a significant reduction in its steel production plans, aiming to cut up to 50 million metric tons annually in an effort to tackle the global steel surplus and meet its carbon emission targets. This restructuring of the world's largest steel industry will have far-reaching impacts on both global steel markets and China's domestic economy, as it seeks to curb overproduction, enhance profitability, and shift towards greener, more sustainable practices. India's Small Exporters Seek Relief from US Steel & Aluminium Tariffs to Maintain Competitive Edge Updated on : Mar 07, 2025 10:16 am

Synopsis: Indian small engineering exporters are urging the government to reduce import duties on select US goods in response to President Donald Trump's impending 25% tariffs on steel and aluminium. These tariffs, set to take effect on March 12, 2025, have raised concerns about rising costs and declining orders. Exporters are seeking a favorable trade deal with the U.S., emphasizing the need for tariff reductions to protect their competitive standing. Read on...

Tosyalı Algerie Marks Milestone with Maiden HRC Export to Tunisia, Spain, & Italy Updated on : Mar 07, 2025 10:16 am

Synopsis: Tosyalı Algerie has successfully shipped its first hot-rolled coil exports to Tunisia, Spain, and Italy, marking a significant step in the company's international trade strategy. The company aims to strengthen its position in global markets while meeting both domestic and international demand with its green steel production capabilities. Read on...

China Steel Corporation Embraces AI for Low-Carbon Transformation & Smart

Manufacturing

Updated on : Mar 07, 2025 10:16 am

Synopsis: China Steel Corporation, Taiwan's largest carbon steel manufacturer, is using AI technology to enhance production efficiency and reduce carbon emissions. The implementation of an intelligent speed control system for sintering machines boosts production and reduces energy waste, helping CSC progress toward carbon neutrality by 2050.

EAEU Launches Anti-Dumping Probe into Chinese Graphite Electrode Imports

Updated on : Mar 07, 2025 10:16 am

Synopsis: The Eurasian Economic Union has initiated an anti-dumping investigation into imports of graphite electrodes from China. The probe focuses on electrodes with a specific diameter range used in furnaces. This investigation comes after previous anti-dumping duties imposed on smaller electrodes from China and aims to address concerns about unfair trade practices.

Strengthening American Manufacturing: Trump's Strategic Tariffs & Record Investments Updated on : Mar 07, 2025 10:16 am

Synopsis: President Donald J. Trump's push to revive American manufacturing focuses on safeguarding domestic industries with strategic tariffs on steel and aluminum. His trade policies have led to historic investments, job creation, and the relocation of foreign companies to U.S. soil. These moves signal a new era for American workers and industries, making the U.S. a global leader in manufacturing once again. Read on...

<u>US Steel Buyers Brace for Impact: 25% Import Tariffs to Disrupt the Market</u> *Updated on : Mar 07, 2025 10:16 am*

Synopsis: The US steel industry is set to experience significant disruptions as 25% import tariffs on steel imports from Canada and Mexico go into effect on March 4, 2025. These tariffs are expected to raise steel prices, disrupt the supply chain, and heavily impact steel buyers, with particular focus on sheet, plate, and wire rod products. The tariffs, part of ongoing trade measures initiated by President Donald Trump, are set to create ripples throughout the North American market, especially with slab steel and stainless steel products being less affected. Read on...

EU Unveils Action Plan to Revitalize Europe's Steel Industry Amid US Tariffs Threat Updated on : Mar 07, 2025 10:16 am

Synopsis: The European Commission is gearing up to unveil an action plan on March 19, 2025, to strengthen the European steel industry amid growing trade uncertainties, high energy costs, and environmental pressures. With the threat of U.S. tariffs on steel imports and an ongoing global overcapacity issue, the EU is focusing on finding sustainable solutions to safeguard its steel sector and maintain its competitive edge. The plan will also address challenges like decarbonization and energy price hikes while ensuring fair trade practices.

EUROFER's Bold Call for Action: A Strategic Dialogue on Europe's Steel Future Updated on : Mar 07, 2025 10:16 am

Synopsis: The European Steel Association has expressed its support for the European Commission's initiative to convene a Strategic Dialogue on Steel. This dialogue aims to address the existential challenges facing the European steel industry and pave the way for the Steel Action Plan expected later this March. With urgent calls for tighter trade safeguards, a stronger Carbon Border Adjustment Mechanism (CBAM), affordable clean energy, and preserving ferrous scrap resources, EUROFER is advocating for decisive and robust action to secure the future of European steel.

India's Record Steel Imports from China, South Korea, & Japan Signal Industry Shifts Updated on : Mar 07, 2025 10:16 am

Synopsis: India's finished steel imports have surged to record highs in the first 10 months of the financial year, with imports from China, South Korea, and Japan leading the charge. This rise in imports marks a pivotal shift, as India, traditionally one of the world's largest steel producers, becomes a net importer of finished steel. The government is now investigating whether to implement measures like safeguard duties to curb this trend.

<u>Trade Restrictions on Steel Recycling: A Threat to Europe's Green Economy & Global</u> <u>Sustainability</u>

Updated on : Mar 07, 2025 10:16 am

Synopsis: The European and global recycling industries have raised strong concerns against proposed trade restrictions on recycled steel exports discussed during the Summit on the Future of the European Steel Industry. These restrictions, aimed at limiting exports to countries outside the EU that don't follow European environmental standards, could severely impact both the European economy and the global environment. Instead, industry leaders advocate for more constructive solutions that promote circular steel economies.

Frank Russo Honored with the Prestigious 2025 Richard S. Fountain Award for Steel Bridge Leadership Updated on : Mar 07, 2025 10:16 am Synopsis: Frank Russo, Ph.D., P.E., from Russo Structural Services, has been named the recipient of the 2025 Richard S. Fountain Award by the Steel Bridge Task Force. Russo's outstanding contributions to steel bridge research, education, and the advancement of engineering standards have left a lasting impact on the industry. He received the award at a Steel Bridge Task Force meeting in Tampa on January 29, 2025. Read on...

Government Recognition of Steel Industry as Strategic Sector: A Game Changer for Malaysia's Future Updated on : Mar 07, 2025 10:16 am

Synopsis: The recent recognition of Malaysia's steel industry as a strategic sector by the government is expected to have profound effects on the sector's recovery and long-term sustainability. The recognition, highlighted by the Independent Steel Committee's findings, addresses challenges the sector faces and offers a clear path to boosting competitiveness, despite external threats like trade tariffs. <u>US Domestic Raw Steel Production Drops by 4.6% in Early March 2025</u> Updated on : Mar 07, 2025 10:16 am

Synopsis: In the week ending March 1, 2025, domestic raw steel production in the U.S. totaled 1,641,000 net tons, reflecting a 4.6% decrease compared to the same period in the previous year. The production also showed a slight decline from the previous week. Year-to-date production is down by 1.3%, highlighting a continued softening in steel output as the capability utilization rate remains lower than last year. Read on...

<u>Turkish Steel Producer Çelik Halat ve Tel Sanayii Reports Financial Setback in 2024</u> Updated on : Mar 07, 2025 10:16 am

Synopsis: Çelik Halat ve Tel Sanayii A.Ş., a prominent steel wire and rope manufacturer based in Kocaeli, Turkey, has reported a significant downturn in its financial results for 2024. The company faced a net loss and a sharp decline in sales revenues, reflecting challenges in both domestic and international markets. The full-year figures show substantial drops in revenue and sales across various product categories. Read on...

US Department of Commerce Finds Continued Dumping Threat on Steel Threaded Rods

from China

Updated on : Mar 07, 2025 10:16 am

Synopsis: The US Department of Commerce (USDOC) concluded its expedited sunset review on the anti-dumping (AD) measures on alloy and certain carbon steel threaded rods from China. The findings, published on February 27, 2025, suggest that lifting the current AD orders would lead to the recurrence of dumping, with potential margins up to 59.45%. The review was part of a broader investigation launched on November 4, 2024, into steel threaded rods from China, India, Taiwan, and Thailand, including both AD and countervailing duties (CVD).
